DbExplorer

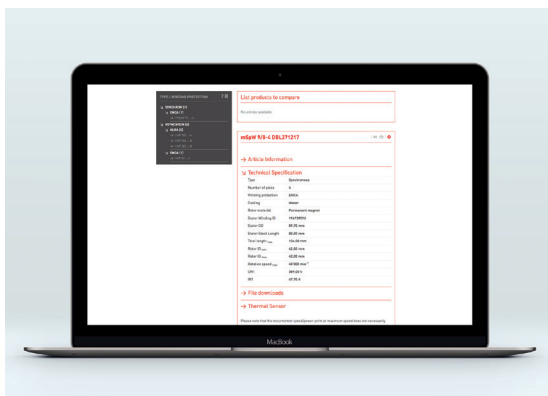

Your customized motor data available 24/7
A digital service for our customers

As an e+a customer get exclusive access to our online database DbExplorer now! Keep your customized motor data saved and up to date for your use at any time. Browse and filter your data with various filter options such as type, geometry or operational data, or simply use convenient full text search.

Thanks to DbExplorer you always have the latest version of your Db data sheets as well as your motor data history at hand. Compare your motor characteristics with general motor capabilities or compare all available motor data sets.

DbExplorer is browser based. There is no need to install new software to access your data anywhere at any time. Yet, security and confidentiality are guaranteed thanks to state of the art encryption technology.

DOWNLOAD OPTIONS on DbExplorer

- ❖ Db data sheets
